

Wybung Head whale viewing area

5 mins

Easy track

2

142 m Return

▲ 9m

This short walk starts at the end of Wybung Head Rd, leading along the top of the ridge to a fairly large clearing with sweeping ocean views. A large sign provides some information on Marine Mammals. This is a good spot to watch migrations - northern migration from June to July and southern migration from Sept to Oct. There is no shade, wind protection or any other facilities, so come well prepared if planning to sit and watch for a while.

Wybung Whale Watching Area

Start

Are you ready to have fun?

Please ensure you and your group are well prepared and equipped for all possible hazards and delays. Check park closures, weather information and Fire Danger Rating before setting out. Optional side trips and alternate routes noted are not included in this walks overall grade, length or time estimate. Please allow extra time for resting and exploring areas of interest. The authors, staff and owners of wildwalks take care in preparing this information but will not accept responsibility for any inconvenience, loss or injury you may experience. Please take care, have fun - Happy Walking.

Getting there Traveling by car is the only practical way to get to Wybung Head car park (gps: -33.1962, 151.6213). Car: A park entry fee is required for driving into the park.

This is a return, so you will finish back at the start.

Find up to date and more information including; travel directions, weather, park closures and walker feedback at <http://wild.tl/whwva>

0 | Wybung Head car park

(70 m 2 mins) From the locked gate at the car park (at the end of Wybung Head Rd), this walk heads downhill along the management trail for a few metres, then turns left and follows the track. The track heads through the heath to a large 'Marine Mammals' sign (about whales) and a large clearing with wide ocean views.

0.07 | Wybung Whale Watching Area

The Wybung Whale Watching Area is a small clearing perched on Wybung Head, just a short walk from the end of Wybung Head Rd. The clearing on the top of the hill provides sweeping views of the ocean. A sign hidden among the scrub provides information about the migrating mammals. There is no shade or wind protection on this exposed grassy knoll, but it does provide a great spot to watch the migration. Northern migration from June to July and southern migration from Sept to Oct.
